

CST8233: Lab #7

Simple Linear Regression

Objective

The objective of this lab is to familiarize the student with the theory topics covered in Week 9. Mainly, this lab focuses on **Simple Linear regression**

Earning

There is no mark for this lab. However, each student should finish the lab's requirements within the lab session and demonstrate the working code to the instructor.

Discussion

Write a program to implement the linear regression algorithms. The program asks the user to input the data then prints the predicted equation. Your output should look like the following test case data.

CTS8233F19

Enter the no. of data pairs to be entered:

5

Enter the x-axis values:

20.5

32.7

51.0

73.2

95.7

Enter the y-axis values:

765

826

873

942

1032

| S.no | x | y(observed) | y(fitted) |
|------|---|-------------|-----------|

The linear fit line is of the form:

$$y = 3.39487x + 702.172$$
